

# TRANSFORMATIONAL CHANGE ASSESSMENT REPORT GENERAL INTERVENTIONS TOOL

Report Date: Tue Nov 21 2023

## Table of Contents

1. Single Intervention Information .....	2
1.1 Describe the policy or action .....	2
1.2 Understanding the transformational vision of the intervention and its context .....	3
1.3 Assessment information .....	4
2. Impact Assessment .....	5
2.1 Process characteristics assessment .....	5
2.2 Outcomes characteristics assessment .....	6
2.3 Process categories assessment .....	10
2.4 Outcomes categories assessment .....	10

# 1 Single Intervention Information

## 1.1 Describe the policy or action

Information	Description
Name	TC NACAG Initiative
Description	aaa
Status	N/A
Date of implementation	N/A
Date of completion (if relevant)	N/A
Implementing entity or entities	N/A
Objectives and benefits	fgggf
Level of the policy	N/A
Geographic coverage	N/A
Sectors covered	
Other related policies	N/A
Reference	N/A

## 1.2 Understanding the transformational vision of the intervention and its context

Time periods	Description of the vision for desired societal, environmental and technical changes
Description of the vision for desired societal, environmental and technical changes	Test
Long-term ( $\geq 15$ years)	Test
Medium-term ( $\geq 5$ years and $<$ than 15 years)	Test
Short-term ( $< 5$ years)	Test
Phase of transformation	Test

Barriers	Explanation	Characteristics affected	Barrier directly targeted by the policy or action
----------	-------------	--------------------------	---

## 1.3 Assessment information

It describes the scope of the assessment in terms of the geographical, temporal and sectoral coverage of the policy.

Information	Description
Assesment type	Ex-post
Geographical area covered	International
Sectors covered	Transport
Opportunities for stakeholders to participate in the assessment	Test

## 2. IMPACT ASSESSMENT

### 2.1 Process characteristics assessment

Process characteristics refer to the main drivers of system change based on the existing literature: technology, agents, incentives, and norms. Each of them contains three characteristics. The table below indicates whether each characteristic is relevant or not relevant for the assessment, based on the barriers identified in previously (is the characteristic affected by any of the barriers?) and whether the characteristic is impacted by the intervention being assessed or not. If a characteristic is relevant, the likelihood score indicates the likelihood of the intervention having an impact on this characteristic. The table presents any justification which supports the score and refers to documents which may back this justification.

Category	Process Characteristic	Relevant/ Possibly relevant/ Not relevant	Guiding Question	Likelihood score	Rationale justifying the score	Supporting Documents Supplied
Technology	Research and Development	Possible relevant	Does the intervention support R&D for building technological capabilities favouring a low-carbon and/or a climate resilient economy?	1	Test	-
	Adoption	Possible relevant	Does the intervention lead to early adoption of promising low-carbon and/or climate resiliency building technologies?	-	Test	-
	Scale up	Not relevant	Does the intervention support the scale-up and diffusion of low-carbon and/or climate resilient innovations?	-	-	-
Agents	Entrepreneurs	Not relevant	Does the intervention promote entrepreneurs, businesses and investors to catalyse transformational change?	-	-	-
	Coalition of advocates	Not relevant	Does the intervention support coalitions and networks that seek to broaden and deepen support for low-carbon and/or climate resilient development?	-	-	-
	Beneficiaries	Not relevant	Does the policy support diverse groups of society affected by the transformational change, which subsequently support the intervention?	-	-	-

Category	Process Characteristic	Relevant/ Possibly relevant/ Not relevant	Guiding Question	Likelihood score	Rationale justifying the score	Supporting Documents Supplied
Incentives	Economic and non-economic	Relevant	Does the intervention use economic and/or non-economic incentives to shift technology and increase market penetration?	2	Test	-
	Disincentives	Possible relevant	Does the intervention disincentivize technologies and businesses contributing to a high carbon and/or climate vulnerable economy?	3	Test	-
	Institutional and regulatory	Not relevant	Does the intervention create or reconfigure existing conditions, including availability of finance for implementation, and put in place regulation and institutions favouring low-carbon and/or climate resilient development?	-	-	-
Norms and behavioral change	Awareness	Not relevant	Does the intervention support awareness raising and education for transition towards sustainable , low-carbon and resilient systems?	-	-	-
	Behavior	Not relevant	Does the intervention support measures that discourage high-carbon and/or climate vulnerable lifestyles and practices, and promote low-carbon and/or climate resilient solutions?	-	-	-
	Social Norms	Not relevant	Does the intervention affect norms within society that align with and further promote low-carbon and/or climate resilient sustainable development?	-	-	-

## 2.2 Outcomes characteristics assessment

Outcome characteristics refer to the scale and sustained nature of outcomes resulting from a policy. Outcomes are measured in terms of GHG emissions reductions, climate adaptation impacts and selected sustainable development impacts across environmental, social and economic dimensions (e.g. air quality, health, jobs, gender equality, energy security). Users assess both the scale and the sustained nature of selected impacts of the policy on GHGs, Adaptation and sustainable development.

Category	Outcome Characteristic	Is the characteristic within the assessment boundaries?	Score	Rationale justifying the score
GHG Scale of the Outcome	International /global level	N/A	Outside Assessment Boundaries	Test
	National /Sectorial level	N/A	Outside Assessment Boundaries	Test
	Subnational /regional/municipal or sub sectorial level	N/A	Outside Assessment Boundaries	Test

Category	Outcome Characteristic	Is the characteristic within the assessment boundaries?	Score	Rationale justifying the score
GHG Time frame over which the outcome is sustained	Long term (>15 years)	N/A	Outside Assessment Boundaries	Test
	Medium term (5-15 years)	N/A	Outside Assessment Boundaries	Test
	Short term (<5 years)	N/A	Outside Assessment Boundaries	Test

Category	Outcome Characteristic	Is the characteristic within the assessment boundaries?	Score	Rationale justifying the score
Adaptation Scale of the Outcome	International /global level	N/A	Outside Assessment Boundaries	Test
	National /Sectorial level	N/A	Outside Assessment Boundaries	Test
	Subnational /regional/municipal or sub sectorial level	N/A	Outside Assessment Boundaries	Test

Category	Outcome Characteristic	Is the characteristic within the assessment boundaries?	Score	Rationale justifying the score
Adaptation Time frame over which the outcome is sustained	Long term (>15 years)	N/A	Outside Assessment Boundaries	Test
	Medium term (5-15 years)	N/A	Outside Assessment Boundaries	Test
	Short term (<5 years)	N/A	Outside Assessment Boundaries	Test

Category	Sustainable Development Goal	Could the intervention have an impact on this particular SDG?	Outcome Characteristic	Is the characteristic within the assessment boundaries?	Score	Rationale justifying the score
SDG Scale of the Outcome	No Poverty	No	International /global level	N/A	Outside Assessment Boundaries	Test
			National /Sectorial level	N/A	Outside Assessment Boundaries	Test
			Subnational /regional/municipal or sub sectorial level	N/A	Outside Assessment Boundaries	Test

Category	Sustainable Development Goal	Could the intervention have an impact on this particular SDG?	Outcome Characteristic	Is the characteristic within the assessment boundaries?	Score	Rationale justifying the score
SDG Time frame over which the outcome is sustained	No Poverty	No	Long term (>15 years)	N/A	Outside Assessment Boundaries	Test
			Medium term (5-15 years)	N/A	Outside Assessment Boundaries	Test
			Short term (<5 years)	N/A	Outside Assessment Boundaries	Test

## 2.3 Process categories assessment

Category	Aggrgated Score
Technology	0
Agents	-
Incentives	2
Norms and behavioral change	-
<b>Process score</b>	<b>0</b>

## 2.4 Outcomes categories assessment

Category	Aggrgated Score
GHG Scale of the Outcome	-
SDG Scale of the Outcome	-
GHG Time frame over which the outcome is sustained	-
SDG Time frame over which the outcome is sustained	-
Adaptation Scale of the Outcome	-
Adaptation Time frame over which the outcome is sustained	-
<b>Outcome score</b>	<b>null</b>
